

# HAMMER

Your Essential Tool

Vaporization doesn't have to be complicated. The *Hammer's* intuitive design provides a familiar experience and is as easy to use as 1, 2, 3, 4. It has a single serving portion size for economical and efficient consumption. The *Hammer* is a compact, butane-powered system designed to go anywhere. A unique combustion chamber keeps your clean air separate from the flame. The *Hammer* will replace your lighter for everyday use and is simply the best tool for healthy consumption.

## YOUR HAMMER

## SAFETY INFORMATION/WARNINGS

Do not touch **ANY** of the metal pieces inside the *Hammer* enclosure

Discontinue operation if you ever see a flame outside of the *Hammer* enclosure

- The top of the *Hammer* will get very warm during use. Discontinue operation if the *Hammer* becomes too hot to touch.
- Do not operate for more than 90 seconds at a time.
- Always use in an upright position.
- NOT FOR ILLEGAL USE**

Keep and store away from children

Be sure flame is completely out after each use

Never expose to heat above 120°F (49°C) or to prolonged sunlight

Ignite away from face and clothing

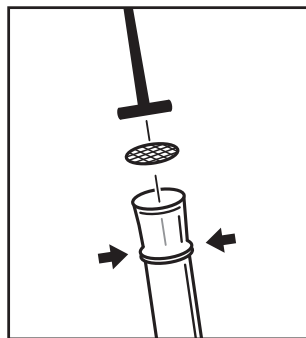

• **Keep away from flammable materials**

## FIRST TIME USE

### The Screen

Use the flat nail head to insert the screen into the flared end of the mouthpiece.

The screen will fit into the ring in the glass.

## Butane: Filling and refilling

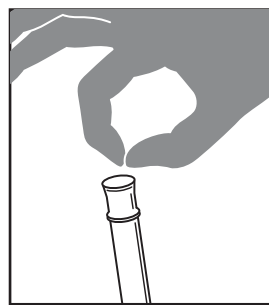

To refill the *Hammer*, turn the unit upside down and firmly push the butane can into the filling valve.

- The tank should be filled in 1-3 seconds.
- Please allow up to 3 minutes after filling for the gas to stabilize.

FRONT

## 1 FILL

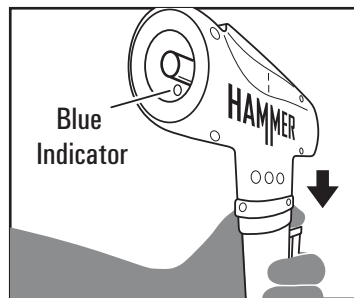

Place finely ground plant material (to be vaporized) onto the screen in the glass mouthpiece.

### DO NOT OVER-PACK!

Loose placement of the material allows for more complete vaporization.

- When properly filled, airflow should feel unobstructed while taking a breath through the mouthpiece.
- Make sure that the material to be vaporized is dry. Moist material can hinder the vaporization process.

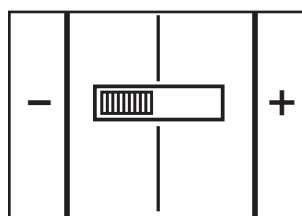

## 2 IGNITE

Press the igniter button and continue to hold down.

- You have achieved proper ignition when the pale blue indicator glows inside the face of the *Hammer*
- If the *Hammer* fails to ignite release the button and press again.

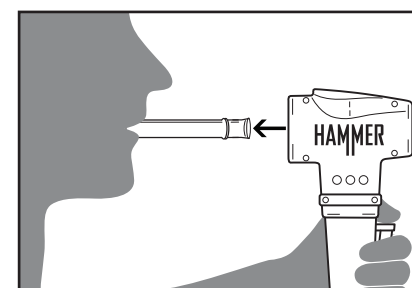

## 3 WAIT

Continue to hold the igniter for 20-30 seconds and allow the *Hammer* to reach operating temperature.

- Actual warm up time will vary based on fuel valve setting.
  - + for Faster Use
  - for Better Control
- If the *Hammer* is already hot, warm up can take less than 10 seconds.

## 4 INHALE

Place the mouthpiece at your lips and gently touch the heat exchanger to the loaded end of the glass.

Inhale SLOWLY until you begin to feel a dry heat on your tongue.

Continue to hold down the igniter button until done inhaling.

### Usage Tips:

You control the temperature of the *Hammer* by:

- adjusting the flame setting via the fuel valve
- slowly inhaling for more complete vaporization
- inhaling quickly for a more gentle hit

Repeat steps 2-4 until plant material begins to appear toasted or turns dark brown.
